PROJECTS

SEISMIC TREMOR ALERT AND DOWNPOUR CAUTION

-The goal of this project is to identify seismic tremors and downpours so that we can issue real-time alert warnings when they may result in earthquakes and rain.

REACTQR GENERATOR

-Developed a QR Code Generator using ReactJS, showcasing proficiency in front-end development. Integrated APIs seamlessly for enhanced functionality, highlighting adaptability and technical skill. Empowered users to generate QR codes effortlessly, demonstrating a commitment to practical web solutions.

MACHINE LEARNING BASED AUTOMATED GRADING SYSTEM FOR STUDENT EXAM PAPERS USING A HANDWRITTEN TEXT RECOGNITION TECHNIQUE.

-The goal of this project is to use machine learning to automate the process of descriptive paper evaluation.

INTERNSHIP - Virtual Mode

Phoenix Research & IT Solutions | July 2022 - August 2022

-During this internship, I gained valuable insights and practical experience in a professional work environment. Inspired by this exposure, I conceived an idea for developing a Java web application.

TOOLS

- Figma
- Adobe XD
- VsCode
- Wordpress
- Power BI
- Streamlit Framework
- Xampp
- Eclipse IDE
- Django Web Framework

ACHIEVEMENTS

COLLEGE LEVEL - FIRST PRIZE in the event of video Presentation for the theme of "GLOBAL WARMING - OUR FUTURE IS DISAPPEARING".

HOBBIES

- Learning
- Coding
- Editing
- Filmmaking (shortfilm)

AREA OF INTEREST

- ReactJS Development
- UI/UX Design
